
Ruby Monstas

Session 19

Agenda

Recap

Networking: The Internet

HTTP: The foundation of the web

Sinatra: Simple way to create web apps

Exercises

Recap

RubyGems & Bundler

What is RubyGems?

What is Bundler?

Rubygems & Bundler

RubyGems: Ruby's package manager

Bundler: Ruby's dependency manager

Networking

The Internet

Networking

Networking

Networking

Ethernet Wireless
Fiber

Networking: Benefits?

Networking: Benefits

- Simple and convenient way to transfer data
 - It's cost efficient
 - Always available
-

Networking: Tradeoff?

Networking: Tradeoff

- Unrestricted & unauthorised access

Networking: The Internet

Networking: The Internet Protocol (IP)

Networking: The Internet Protocol (IP)

Networking: The Internet Protocol (IP)

Networking: The Internet Protocol (IP)

IP: Facts

- Consistent way of communicating
 - Decoupled from manufactures
 - Regardless technology (cable, wireless, optical)
 - The standard for communication in networks
-

HTTP: Evolution of the Internet

HTTP: Evolution of the Internet

Client

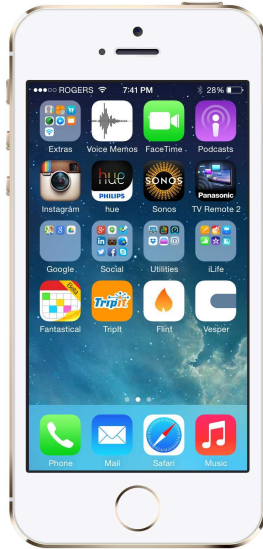

Server

HTTP: Computing model evolution

Client

Request

Response

Server

HTTP: How it works

Uniform Resource Locator

Request Method

Media Type

HTTP: How it works

[Home](#) / [Curriculum](#) / [Apply](#) / [Location](#) / [Team](#)

Our course curriculum is based on the curriculum of our Berlin colleagues: [Course](#)

HTTP: Uniform Resource Locator (URL)

DOMAIN NAME

rubymonstas.ch

RESOURCE

/curriculum

HTTP: Method & Format

REQUEST METHOD

GET

FORMAT

.HTML

HTTP: How it works

[Home](#) / [Curriculum](#) / [Apply](#) / [Location](#) / [Team](#)

Our course curriculum is based on the curriculum of our Berlin colleagues: [Course](#)

HTTP

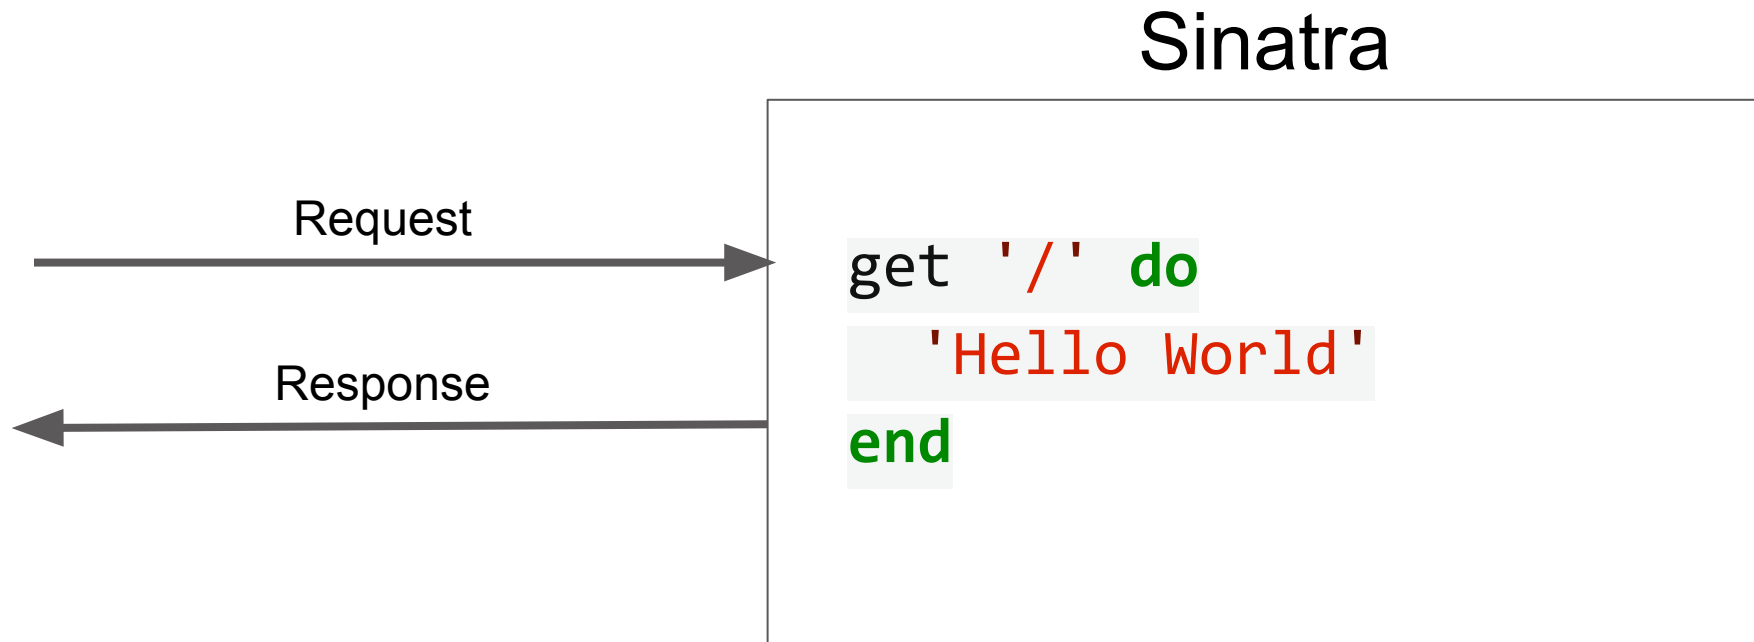

Example

Sinatra

A quick way to create web applications in Ruby.

Sinatra: Map routes to code

Time to practice
