HTML Form

Input 1 text:

Input 2 checkbox:

Input 3 color:

Input 4 file: Browse... No file selected.

Input 5 email:

Input 6 hidden:

Input 7 number:

Input 8 password:

Input 9 radio:

```
<input type="XY" name="UNIQUE_NAME" />
```

```
<input type="text" name="some_unique_name1" />
```

```
<input type="checkbox" name="some_unique_name2" />
```

```
<input type="color" name="some_unique_name3" />
```

```
<input type="file" name="some_unique_name4" />
```

```
<input type="email" name="some_unique_name5" />
```

```
<input type="hidden" name="some_unique_name6" />
```

```
<input type="number" name="some_unique_name7" />
```

```
<input type="password" name="some_unique_name8" />
```

```
<input type="radio" name="some_unique_name9" />
```

Developer Tools (HTTP POST)

The image shows a web browser window with the URL `localhost:4567/example_form`. The browser's developer tools are open, showing the HTML structure of the form and the Network tab displaying the POST request parameters.

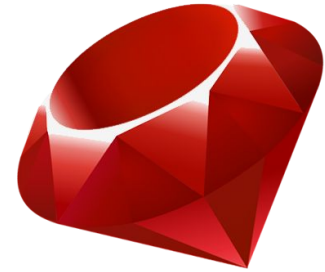

Form Structure (HTML):

```
<form method="POST">
  <p>
    <label>Input 1 text:
      <input type="text" name="input1" />
    </label>
  </p>
  <p>
    <label>Input 4 file:
      <input type="file" name="input4" />
    </label>
  </p>
  <p>
    <label>Input 7 number:
      <input type="number" name="input7" />
    </label>
  </p>
</form>
```

Network Tab (Params):

Header	Value
input1	""
input3	"#000000"
input4	""
input15	""
input6	""
input7	""
input8	""
input10	"50"
input12	""
input13	""
input14	"asdf"
submit	"Submit"
